“Professionals within the information security management field find great value in the CISM credential. The CISM credential measures expertise on the subjects of information security governance, risk management, information security program management, information security management and response management. It distinguishes you among other candidates in the information security field, and it appropriately identifies you as having the knowledge and expertise required to get the job done effectively.”

David Simpson, CISM, CISA
Managing Director, CQR Consulting, Australia

Course Focus and Features:

This two-day seminar focuses exclusively on the essential areas covered in the CISM® exam. The review course covers the core sections and a series of sample exam questions that provides participants with a "feel" of the format and the types of questions encountered on the CISM exam. The correct answers of each question are also reviewed for a better understanding of expectations of the ISACA Certification Board. This intensive course is an ideal way to prepare for the exam. Participants gain valuable experience reviewing these core sections and answering sample exam questions with experienced instructors while strengthening their skills and building confidence. As a way of keeping the training costs low and to facilitate our green environmental initiative, all training materials will be electronically transmitted to students prior to the class. Students are asked to bring the material to the class in either an electronic or paper format. No handouts will be available on-site.

Who Should Attend:

Chief Information Officers, Chief IT Security Officers, and Security Professionals who are taking or considering taking the CISM examination; anyone seeking an overall understanding of essential IT security risks and controls. The Certified Information Security Manager is ISACA's strong credential earned by security professionals. It is for the individual who must maintain a view of the "big picture" by managing, designing, overseeing, and assessing an enterprise's information security. For more information on the CISM certification, refer to <http://www.isaca.org/cism>.

What You Will Learn:

Chapter 1: Information Security Governance (23%)

Establish and maintain a framework to provide assurance that information security strategies are aligned with business objectives and consistent with applicable laws and regulations.

Chapter 2: Information Risk Management (22%)

Identify and manage information security risks to achieve business objectives.

Chapter 3: Information Security Program Development (17%)

Create and maintain a program to implement the information security strategy.

Chapter 4: Information Security Program Management (24%)

Oversee and direct information security activities to execute the information security program.

Chapter 5: Incident Management and response Management (14%)

Plan, develop and manage a capability to detect, respond to and recover from information security events.

Prerequisites:

- Basic understanding of IT security or IT security management
- Obtain and review the ISACA published study materials:
 - CISM Review Manual 2009
 - CISM Review Questions, Answers & Explanations Manual 2009
 - CISM Review Questions, Answers & Explanations Manual 2009 SupplementFor more information about the study materials and ordering through the ISACA International bookstore, refer to <http://www.isaca.org/bookstore>.

Instructor Biographies

Bryan Cline, Ph.D., CISM

Bryan S. Cline, Ph.D., M.S.I.E., is the Director of IS Risk Management for The Children's Hospital of Philadelphia, Pennsylvania (USA), and former Technical Director of Information Assurance Services for QinetiQ North America Defense Solutions in Stafford, Virginia (USA). Dr. Cline has more than 25 years of experience in information systems—10 years of which were in information systems security management and engineering in the US Department of Defense and North Atlantic Treaty Organization. He holds a Doctorate in Information Systems with a concentration in Information Assurance Policy from the University of Fairfax, Vienna, Virginia (USA), a Master of Science degree in Industrial Engineering with a concentration in Operations Research from the University of Oklahoma, Norman (USA), and a Baccalaureate in Mathematics from the University of Texas at Arlington (USA). He has participated in security and risk panels at SecureWorld, TechnoSecurity and TechnoForensics, presented on security engineering topics at the DoD CyberCrime Conference and INCOSE International Symposia, and published articles in peer-reviewed journals and proceedings such as the Information Systems Control Journal. Dr. Cline also holds multiple professional certifications in information and physical security, program management, and engineering, including the CISSP-ISSEP, CISM, CISA, CPP, CAP (PM-II), and ASEP.

Ellis Fagbami, CISA, CISM, CISSP, PMP

Ellis Fagbami, is Managing Consultant at Compu-Digital Technologies Inc., an IT Security and Audit services firm providing security consulting and training services to clients in diverse industries. Ellis has strong background in application security and systems management and has experience in information security management, business continuity planning and disaster recovery planning. Ellis is a member of ISACA and serves on the Scholarship Committee of its Philadelphia Chapter. He is also an active member of the International Information Systems Security Certification Consortium (ISC2), and the Project Management Institute, PMI. Ellis holds a Bachelor of Science degree in Computer Science and an MBA with a specialization in management. Before his current position he was a Lead Senior Consultant at Public Service Electric & Gas (PSEG) and prior to that he was a Principal Consultant at Keane Inc.

Muazzam Malik, CISM, CISA, CISSP, QSA, GSNA

Mr. Malik is a manager in CIO Solutions practice of Protiviti Inc. He currently manages Protiviti's Technology Lab in Philadelphia, providing information security services such as penetration testing, risk, vulnerability and web application assessments and PCI scanning services. Muazzam has been with Protiviti for six plus years, and has experience with the range of information security standards and industry regulations, such as PCI Data Security Standards, State Privacy Laws, ISO 17799, Health Insurance Portability & Accountability Act (HIPAA), Gramm-Leach Bliley Act (GLBA). He has delivered high quality security and IT audit services to a variety of clients in retail, financial services, education, pharmaceutical, healthcare, and manufacturing industries. He is also an active member of the ISACA, ISSA, and FBI Infraguard. Mr. Malik has facilitated a week long new consultant school and has presented in number of internal and external information security training events.

Fernando Reiser, CISA, CISM, CISSP, CIPP

Currently, Mr. Reiser leads the information security program activities for a major New Jersey based property and casualty insurance group. Mr. Reiser has obtained extensive information security and data privacy experience within the financial services industry. His major responsibilities have included oversight over information security, customer privacy and regulatory compliance issues. Specific work assignments have involved the development of information security programs, IT control frameworks, delivery of information security awareness and education and assessment of IT risks. Mr. Reiser has developed and implemented policies, procedures and IT risk assessments for a number of organizations to ensure compliance with Sarbanes – Oxley, GLBA, HIPAA, FERPA, FDICIA and FFIEC regulatory requirements. In addition, he has been directly responsible for implementing technical security projects involving network perimeter security and user authentication.

Registration:

Due to the high demand for the review course and limited space, participants are encouraged to register as early as possible to reserve a seat. Registration and complete course payment must be received by April 24, 2009.

Payment Processing:

Acteva.com has been contracted to provide our participants with the flexibility of online registration and payment processing. Acteva's secure online system adheres to the chapter's policy and protects your personal information and privacy.

We are committed to protecting your privacy and to focus on the chapter's primary purpose of promoting the education of individuals for the improvement and development of their capabilities relating to auditing and/or security management. We welcome you to immediately begin using the registration process with confidence. For your convenience the payment processing steps have been detailed below:

Steps:

1. Click the following link or copy and paste the link into your browser.
<http://www.acteva.com/booking.cfm?bevalD=175156>
<http://www.acteva.com/booking.cfm?bevalD=175156>
2. Specify the number of attendees for the session(s).
Note: All the sessions are priced for ISACA Members and Non-members. Non-members are encouraged to join [ISACA](#) and start enjoying membership benefits.
3. Click the button
4. Enter contact information and ISACA member information
5. Click the button to confirm your order
6. Review the order and select a payment method.
 - Visa
 - MasterCard
 - Discover
 - American Express
 - Any ATM or debit card displaying the Visa or MasterCard hologram and logo
 - Personal or Corporate Check (Make check payable to "Acteva" and mail to: Acteva, 60 Spear St., 9th Floor, San Francisco, CA 94105). Mailed checks may take ten or more business days to be sent, so please plan accordingly. Specify the correct amount on the check and place the **Transaction Number** in the memo section on the check. Your registration will not be complete until the payment is received.
7. Click the button; a receipt is sent via email once the transaction has completed.

Please Note:

- Registration is contingent upon full payment of the registration fee. To guarantee your registration, course fees must be received no later than the Friday, April 24, 2009.
- Refunds due to cancellations prior to deadline are paid net of all processing fees. No cancellations can be accepted after Friday, April 24, 2009.
- Substitutions are accepted and encouraged. Substitution of a non-member for a member will result in additional non-member fees being charged.
- The CPEs provided by the chapter are not NASBA certified but are recognized by the ISACA International organization to meet continuing education requirements for the CISA and CISM certifications.
- If ISACA Philadelphia must cancel a course or event for any reason, liability is limited to the registration fees paid only. ISACA Philadelphia is not responsible for other expenses incurred including travel or accommodation fees.
